“In the face of significant market turmoil, MSCI once again delivered strong results, including our best third quarter ever of recurring net new sales. Among other achievements, we posted our highest Index subscription run rate growth in a decade at 12.6%, grew our Climate business subscription run rate by 86.0% and posted our highest Analytics retention rate ever at 95.9%,” said Henry A. Fernandez, Chairman and CEO of MSCI.

“We did this even as global headwinds grew stronger, demonstrating the resilience and adaptability of our all-weather franchise. While the macro environment has created challenges for companies across industries, MSCI continues to benefit from our mission-critical solutions, our diversified client base and our commitment to financial discipline,” added Mr. Fernandez.

Third Quarter Consolidated Results

Operating Revenues: Operating revenues were \$560.6 million, up 8.4%. Organic operating revenue growth was 7.2%. The \$43.5 million increase was the result of \$62.6 million in higher recurring subscription revenues offset by a \$16.1 million decrease in asset-based fees, and a \$3.0 million decrease in non-recurring revenues.

Run Rate and Retention Rate: Total Run Rate at September 30, 2022 was \$2,203.3 million, up 5.1%. Recurring subscriptions Run Rate increased by \$177.9 million, and asset-based fees Run Rate decreased by \$70.8 million. Organic recurring subscriptions Run Rate growth was 14.2%. Retention Rate in third quarter 2022 was 96.4%, compared to 94.5% in third quarter 2021.

Expenses: Total operating expenses were \$251.1 million, up 6.0%. Adjusted EBITDA expenses were \$219.7 million, up 4.4%, primarily reflecting higher non-compensation costs including in the areas of information technology costs and professional fees. The increase also reflected higher compensation and benefits costs related to continued investments to support growth, including increased headcount in technology, data services and research. Total operating expenses excluding the impact of foreign currency exchange rate fluctuations ("ex-FX") and adjusted EBITDA expenses ex-FX increased 11.5% and 10.3%, respectively.

Headcount: As of September 30, 2022, headcount was 4,767 employees, with approximately 35% and approximately 65% of employees located in developed market and emerging market locations, respectively.

Other Expense (Income), Net: Other expense (income), net was \$40.3 million, down 49.3%. The lower net expenses were primarily driven by the absence of debt extinguishment costs in third quarter 2022, as well as higher interest income, partially offset by higher interest expense associated with higher average outstanding debt balances.

Income Taxes: The effective tax rate was 19.5% in third quarter 2022 compared to 15.3% in third quarter 2021. The increase was primarily related to the absence of the impact of significant discrete tax benefits in third quarter 2022, in relation to pretax income, including the tax impact of loss on debt extinguishment recognized in third quarter 2021. In addition, the third quarter of 2021 reflected the tax impact of the settlement of prior year items.

Net Income: As a result of the factors described above, net income was \$216.6 million, up 27.5%.

Adjusted EBITDA: Adjusted EBITDA was \$341.0 million, up 11.2%. Adjusted EBITDA margin in third quarter 2022 was 60.8%, compared to 59.3% in third quarter 2021.

Index operating revenues were \$322.2 million, up 0.2%. The \$0.7 million increase was driven by \$20.2 million in higher recurring subscription revenues offset by \$16.1 million in lower asset-based fees and \$3.4 million in lower non-recurring revenues.

Growth in recurring subscription revenues was primarily driven by strong growth from both market-cap weighted and factor, ESG and climate Index products.

The decrease in revenues attributable to asset-based fees reflected a decline in revenues from ETFs linked to MSCI equity indexes and non-ETF indexed funds linked to MSCI indexes, driven by a decrease in average AUM and average basis point fees. The decrease in revenues attributable to asset-based fees was partially offset by an increase in revenues from exchange traded futures and options contracts linked to MSCI indexes, driven by volume increases.

Index Run Rate as of September 30, 2022, was \$1.2 billion, up 1.1%. The \$13.0 million increase was comprised of a \$83.8 million increase in recurring subscription Run Rate offset by a \$70.8 million decrease in asset-based fees Run Rate. The increase in recurring subscription Run Rate was primarily driven by strong growth from market cap-weighted, factor, ESG and climate, and custom and specialized Index products, and reflected growth across all regions and client segments. The decline in asset-based fees Run Rate primarily reflected lower AUM in ETFs linked to MSCI equity indexes and non-ETF indexed funds linked to MSCI indexes, partially offset by higher exchange traded futures and options volume.

All Other – Private Assets operating revenues, which reflects the Real Assets operating segment, were \$35.9 million, up 130.0%, primarily driven by revenues attributable to the acquisition of RCA as well as growth in Enterprise Analytics, Global Intel and Climate Value-at-Risk products, partially offset by unfavorable foreign currency exchange rate fluctuations. Excluding the impact of the acquisition, All Other – Private Assets operating revenues increased 13.9%. All Other – Private Assets organic operating revenues increased by 30.6%.

All Other – Private Assets Run Rate, which reflects the Real Assets operating segment, was \$137.4 million as of September 30, 2022, up 4.3%, driven by growth in the RCA business as well as growth in Global Intel, Enterprise Analytics and Climate Value-at-Risk products, partially offset by unfavorable foreign currency exchange rate fluctuations. Excluding the impact of foreign currency exchange rate fluctuations, All Other – Private Assets Run Rate growth was 11.9%.

Select Balance Sheet Items and Capital Allocation

Cash Balances and Outstanding Debt: Cash and cash equivalents was \$867.1 million as of September 30, 2022. The Company maintains its existing revolving credit facility, which was undrawn as of September 30, 2022. MSCI typically seeks to maintain minimum cash balances globally of approximately \$225.0 million to \$275.0 million for general operating purposes.

Total principal amounts of debt outstanding as of September 30, 2022, were \$4.6 billion. The total debt to net income ratio (based on trailing twelve months net income) was 5.3x. The total debt to adjusted EBITDA ratio (based on trailing twelve months adjusted EBITDA) was 3.4x.

MSCI seeks to maintain total debt to adjusted EBITDA in a target range of 3.0x to 3.5x.

Capex and Cash Flow: Capex was \$18.0 million, and cash provided by operating activities increased by 49.6% to \$323.1 million, primarily reflecting higher cash collections from customers and lower income tax payments, partially offset by cash expenses paid in the quarter. Free cash flow for third quarter 2022 was up 51.7% to \$305.1 million.

Share Count and Share Repurchases: Weighted average diluted shares outstanding were 80.9 million in third quarter 2022, down 3.2% year-over-year. Total share repurchases during the quarter were \$165.0 million or 382,986 shares at an average repurchase price of \$430.94. Total shares outstanding as of September 30, 2022 were 80.1 million. A total of approximately \$1.3 billion remains on the outstanding share repurchase authorization as of trade date of October 24, 2022.

Dividends: Approximately \$100.7 million in dividends were paid to shareholders in third quarter 2022. On October 24, 2022, the MSCI Board of Directors declared a cash dividend of \$1.25 per share for fourth quarter 2022, payable on November 30, 2022, to shareholders of record as of the close of trading on November 10, 2022.

Full-Year 2022 Guidance

MSCI's guidance for the year ending December 31, 2022 ("Full-Year 2022") is based on assumptions about a number of macroeconomic and capital market factors, in particular related to equity markets. These assumptions are subject to uncertainty, and actual results for the year could differ materially from our current guidance, including as a result of ongoing uncertainty related to the duration, magnitude and impact of the ongoing COVID-19 pandemic as well as the economic and market impacts of elevated inflation levels and Russia's invasion of Ukraine.

Forward-Looking Statements

This earnings release contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, including without limitation, MSCI's full-year 2022 guidance. These forward-looking statements relate to future events or to future financial performance and involve known and unknown risks, uncertainties and other factors that may cause our actual results, levels of activity, performance or achievements to be materially different from any future results, levels of activity, performance or achievements expressed or implied by these statements. In some cases, you can identify forward-looking statements by the use of words such as "may," "could," "expect," "intend," "plan," "seek," "anticipate," "believe," "estimate," "predict," "potential" or "continue," or the negative of these terms or other comparable terminology. You should not place undue reliance on forward-looking statements because they involve known and unknown risks, uncertainties and other factors that are, in some cases, beyond MSCI's control and that could materially affect actual results, levels of activity, performance or achievements.

Other factors that could materially affect actual results, levels of activity, performance or achievements can be found in MSCI's Annual Report on Form 10-K for the fiscal year ended December 31, 2021 filed with the Securities and Exchange Commission ("SEC") on February 11, 2022 and in quarterly reports on Form 10-Q and current reports on Form 8-K filed or furnished with the SEC. If any of these risks or uncertainties materialize, or if MSCI's underlying assumptions prove to be incorrect, actual results may vary significantly from what MSCI projected. Any forward-looking statement in this earnings release reflects MSCI's current views with respect to future events and is subject to these and other risks, uncertainties and assumptions relating to MSCI's operations, results of operations, growth strategy and liquidity. MSCI assumes no obligation to publicly update or revise these forward-looking statements for any reason, whether as a result of new information, future events, or otherwise, except as required by law.

Notes Regarding the Use of Operating Metrics

MSCI has presented supplemental key operating metrics as part of this earnings release, including Retention Rate, Run Rate, subscription sales, subscription cancellations and non-recurring sales.

Retention Rate is an important metric because subscription cancellations decrease our Run Rate and ultimately our future operating revenues over time. The annual Retention Rate represents the retained subscription Run Rate (subscription Run Rate at the beginning of the fiscal year less actual cancels during the year) as a percentage of the subscription Run Rate at the beginning of the fiscal year.

The Retention Rate for a non-annual period is calculated by annualizing the cancellations for which we have received a notice of termination or for which we believe there is an intention not to renew or discontinue the subscription during the non-annual period, and we believe that such notice or intention evidences the client’s final decision to terminate or not renew the applicable agreement, even though such notice is not effective until a later date. This annualized cancellation figure is then divided by the subscription Run Rate at the beginning of the fiscal year to calculate a cancellation rate. This cancellation rate is then subtracted from 100% to derive the annualized Retention Rate for the period.

Retention Rate is computed by operating segment on a product/service-by-product/service basis. In general, if a client reduces the number of products or services to which it subscribes within a segment, or switches between products or services within a segment, we treat it as a cancellation for purposes of calculating our Retention Rate except in the case of a product or service switch that management considers to be a replacement product or service. In those replacement cases, only the net change to the client subscription, if a decrease, is reported as a cancel. In the Analytics and the ESG and Climate operating segments, substantially all product or service switches are treated as replacement products or services and netted in this manner, while in our Index and Real Assets operating segments, product or service switches that are treated as replacement products or services and receive netting treatment occur only in certain limited instances. In addition, we treat any reduction in fees resulting from a down-sell of the same product or service as a cancellation to the extent of the reduction. We do not calculate Retention Rate for that portion of our Run Rate attributable to assets in index-linked investment products or futures and options contracts, in each case, linked to our indexes.

Run Rate estimates at a particular point in time the annualized value of the recurring revenues under our client license agreements (“Client Contracts”) for the next 12 months, assuming all Client Contracts that come up for renewal, or reach the end of the committed subscription period, are renewed and assuming then-current currency exchange rates, subject to the adjustments and exclusions described below. For any Client Contract where fees are linked to an investment product’s assets or trading volume/fees, the Run Rate calculation reflects, for ETFs, the market value on the last trading day of the period, for futures and options, the most recent quarterly volumes and/or reported exchange fees, and for other non-ETF products, the most recent client-reported assets. Run Rate does not include fees associated with “one-time” and other non-recurring transactions. In addition, we add to Run Rate the annualized fee value of recurring new sales, whether to existing or new clients, when we execute Client Contracts, even though the license start date, and associated revenue recognition, may not be effective until a later date. We remove from Run Rate the annualized fee value associated with products or services under any Client Contract with respect to which we have received a notice of termination, non-renewal or an indication the client does not intend to continue their subscription during the period and have determined that such notice evidences the client’s final decision to terminate or not renew the applicable products or services, even though such notice is not effective until a later date.

“Organic subscription Run Rate growth” is defined as the period over period Run Rate growth, excluding the impact of changes in foreign currency and the first year impact of any acquisitions, including the acquisition of RCA completed on September 13, 2021. It is also adjusted for divestitures. Changes in foreign currency are calculated by applying the currency exchange rate from the comparable prior period to current period foreign currency denominated Run Rate.

Sales represents the annualized value of products and services clients commit to purchase from MSCI and will result in additional operating revenues. Non-recurring sales represent the actual value of the customer agreements entered into during the period and are not a component of Run Rate. New recurring subscription sales represent additional selling activities, such as new customer agreements, additions to existing agreements or increases in price that occurred during the period and are additions to Run Rate. Subscription cancellations reflect client activities during the period, such as discontinuing products and services and/or reductions in price, resulting in reductions to Run Rate. Net new recurring subscription sales represent the amount of new recurring subscription sales net of subscription cancellations during the period, which reflects the net impact to Run Rate during the period.

Total gross sales represent the sum of new recurring subscription sales and non-recurring sales. Total net sales represent the total gross sales net of the impact from subscription cancellations.

Notes Regarding the Use of Non-GAAP Financial Measures

MSCI has presented supplemental non-GAAP financial measures as part of this earnings release. Reconciliations are provided in Tables 9 through 13 below that reconcile each non-GAAP financial measure with the most comparable GAAP measure. The non-GAAP financial measures presented in this earnings release should not be considered as alternative measures for the most directly comparable GAAP financial measures. The non-GAAP financial measures presented in this earnings release are used by management to monitor the financial performance of the business, inform business decision-making and forecast future results.

“Adjusted EBITDA” is defined as net income before (1) provision for income taxes, (2) other expense (income), net, (3) depreciation and amortization of property, equipment and leasehold improvements, (4) amortization of intangible assets and, at times, (5) certain other transactions or adjustments, including, when applicable, impairment related to sublease of leased property and certain non-recurring acquisition-related integration and transaction costs.

“Adjusted EBITDA expenses” is defined as operating expenses less depreciation and amortization of property, equipment and leasehold improvements and amortization of intangible assets and, at times, certain other transactions or adjustments, including, when applicable, impairment related to sublease of leased property and certain non-recurring acquisition-related integration and transaction costs.

“Adjusted net income” and “adjusted EPS” are defined as net income and diluted EPS, respectively, before the after-tax impact of: the amortization of acquired intangible assets, including the amortization of the basis difference between the cost of the equity method investment and MSCI’s share of the net assets of the investee at historical carrying value and, at times, certain other transactions or adjustments, including, when applicable, the impact related to costs associated with debt extinguishment, the impact related to certain non-recurring acquisition-related integration and transaction costs, the impact from impairment related to sublease of leased property and the impact related to gain from changes in ownership interest of equity method investee.

“Capex” is defined as capital expenditures plus capitalized software development costs.

“Free cash flow” is defined as net cash provided by operating activities, less Capex.

“Organic operating revenue growth” is defined as operating revenue growth compared to the prior year period excluding the impact of acquired businesses, divested businesses and foreign currency exchange rate fluctuations.

Asset-based fees ex-FX does not adjust for the impact from foreign currency exchange rate fluctuations on the underlying assets under management (“AUM”).

We believe adjusted EBITDA and adjusted EBITDA expenses are meaningful measures of the operating performance of MSCI because they adjust for significant one-time, unusual or non-recurring items as

well as eliminate the accounting effects of certain capital spending and acquisitions that do not directly affect what management considers to be our ongoing operating performance in the period.

We believe adjusted net income and adjusted EPS are meaningful measures of the performance of MSCI because they adjust for the after-tax impact of significant one-time, unusual or non-recurring items as well as eliminate the impact of any transactions that do not directly affect what management considers to be our ongoing operating performance in the period. We also exclude the after-tax impact of the amortization of acquired intangible assets and amortization of the basis difference between the cost of the equity method investment and MSCI's share of the net assets of the investee at historical carrying value, as these non-cash amounts are significantly impacted by the timing and size of each acquisition and therefore not meaningful to the ongoing operating performance in the period.

We believe that free cash flow is useful to investors because it relates the operating cash flow of MSCI to the capital that is spent to continue and improve business operations, such as investment in MSCI's existing products. Further, free cash flow indicates our ability to strengthen MSCI's balance sheet, repay our debt obligations, pay cash dividends and repurchase shares of our common stock.

We believe organic operating revenue growth is a meaningful measure of the operating performance of MSCI because it adjusts for the impact of foreign currency exchange rate fluctuations and excludes the impact of operating revenues attributable to acquired and divested businesses for the comparable prior year period, providing insight into our ongoing operating performance for the period(s) presented.

We believe that the non-GAAP financial measures presented in this earnings release facilitate meaningful period-to-period comparisons and provide a baseline for the evaluation of future results.

Adjusted EBITDA expenses, adjusted EBITDA, adjusted net income, adjusted EPS, Capex, free cash flow and organic operating revenue growth are not defined in the same manner by all companies and may not be comparable to similarly-titled non-GAAP financial measures of other companies. These measures can differ significantly from company to company depending on, among other things, long-term strategic decisions regarding capital structure, the tax jurisdictions in which companies operate and capital investments. Accordingly, the Company's computation of these measures may not be comparable to similarly-titled measures computed by other companies.

Notes Regarding Adjusting for the Impact of Foreign Currency Exchange Rate Fluctuations

Foreign currency exchange rate fluctuations reflect the difference between the current period results as reported compared to the current period results recalculated using the foreign currency exchange rates in effect for the comparable prior period. While operating revenues adjusted for the impact of foreign currency fluctuations includes asset-based fees that have been adjusted for the impact of foreign currency fluctuations, the underlying AUM, which is the primary component of asset-based fees, is not adjusted for foreign currency fluctuations. Approximately three-fifths of the AUM is invested in securities denominated in currencies other than the U.S. dollar, and accordingly, any such impact is excluded from the disclosed foreign currency-adjusted variances.

(1) We have not provided a full line-item reconciliation for adjusted EBITDA expenses to total operating expenses for this future period because we are not able to provide guidance on the individual reconciling items between total operating expenses and adjusted EBITDA expenses. We believe the impact and timing of these potential future items are inherently uncertain and difficult to predict and are unavailable without unreasonable efforts.

(2) Incremental and non-recurring costs attributable to acquisitions directly related to the execution of the transaction and integration of the acquired business that have occurred no later than 12 months after the close of the transaction.
